Reasons for allowance

1. Claims 1-19 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record taken either singularly or in combination fails to anticipate or fairly suggest the limitation of the dependent claims, in such manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims, which include a plurality of relatively rigid light guides in overlying relation to one another, each of said light guides having at least one light input surface, at least one light source positioned along said light input surface for supplying light to said light guides, and a plurality of light extracting deformities on at least one surface of each of said light guides for controlling an output ray angle distribution of emitted light to suit a particular application, said light guides being positioned relative to one another such that the light emitted from at least one of said light guides passes through another of said light guides in a desired direction or output ray angle distribution.
